Objective

I want to work as a Data Analyst where I can use my Excel and data analysis skills. My goal is to help the company organize data and make better business decisions.

Education

B.Sc. in CSE, Gopalganj Science & Technology University, (4th year Continue)
HSC in Science, Rajshahi Govt. City Collage, 2020
SSC in Science, Chataidubi High School, 2018

Key Skills

- Data Analytics: Excel, SQL(learning), Python
- Visualization: Power BI
- Tools: Google Slides, MS Office
- Communication and Team Collaboration

Projects

1. **Socio-Demographic Analysis of University Students' Caffeine Intake and Psychological Health (Excel)**

- Analyzed university students' caffeine consumption patterns and psychological health using Excel.
- Performed statistical tests (Mean, SD, Chi-square) and visualized data with charts and graphs.
- Identified correlations between caffeine intake, anxiety, and depression levels among students.

2. **Store Data Analysis (Excel)**

- Performed data cleaning, analysis, and visualization using Microsoft Excel.
- Created interactive dashboards with Pivot Tables & Charts to track sales trends and customer behavior.
- Delivered insights on top-selling products, seasonal trends, and regional performance for better decision-making**.**
